Software Engineer | Full-Stack Development | Cloud & Real-Time Data Pipelines

Professional Summary

B.Tech **Electronics & Telecommunication Engineering** graduate (CGPA: 8.6) with internship experience at **Kinetic Green Energy & Power Solutions Ltd.** Built scalable **N-Tier ASP.NET Core & Django** applications in **JavaScript**, and **C#**, with **RBAC**, **RESTful APIs**, and real-time **MQTT telemetry pipelines**. Experienced with **AWS cloud deployment**, **Docker/CI-CD workflows**, and **Agile/Scrum** delivery, with a strong foundation in troubleshooting, debugging, and cross-functional collaboration.

Education

Vishwakarma Institute of Information Technology, Pune

2022 – 2026

B.Tech in Electronics & Telecommunication Engineering

CGPA: 8.6 / 10.0

Lt. Raosaheb Jamkar Jn. College

Feb 2022

Higher Secondary Certificate (HSC)

75.5%

Technical Skills

- ❖ **Languages & Frameworks:** JavaScript, C#, ASP.NET Core, React.js, Django, HTML/CSS, SQL
- ❖ **Cloud & DevOps:** AWS (IoT Core, S3, ECS, Lambda), Docker, Git, CI/CD Pipelines, Microservices
- ❖ **Databases:** MS SQL Server, PostgreSQL (TimescaleDB), Vector Databases
- ❖ **Backend & API:** RESTful APIs, JWT Authentication, Entity Framework Core, AutoMapper, RBAC, MQTT
- ❖ **Practices & Tools:** Agile/Scrum, Postman, Swagger, VS Code, Unit/Automated Testing, LangChain, OpenAI API
- ❖ **Familiar:** C++, Angular.js, MySQL, Node.js, React Native, Blockchain, LLMs, Agentic AI

Experience

Kinetic Green Energy & Power Solutions Ltd.

Jan 2026 – Present

Software Engineering Intern — R&D Department

Pune, Maharashtra

Smart PLM TeamCenter System

- ❖ **Automated Lifecycle & Approval Workflow:** Conducted technical requirements analysis to engineer a Smart PLM platform (**ASP.NET Core 8**, Entity Framework Core), translating BOM structuring and ECR/ECN state-machine logic into robust specifications — reducing engineering overhead by **~55%**.
- ❖ **N-Tier Backend & BOM Impact Engine:** Built a scalable **N-Tier Web API** with JWT-based RBAC, AutoMapper DTOs, and a recursive BOM traversal algorithm; MSSQL stored procedures for KPI dashboards with full audit trail reduced record-maintenance effort by **50–60%**.
- ❖ **Documentation, CI/CD & Stakeholder Alignment:** Authored API design specs and technical documentation for cross-functional knowledge transfer; **dockerized** services and maintained **Git**-based version-controlled deployments for consistent builds across environments.

EV Web Portal — Telemetry, RBAC & Cloud Infrastructure

- ❖ **RBAC & Real-Time Telemetry Pipeline:** Designed a **7-level RBAC** system (OEM to End-User) managing **500+** EV lifecycle workflows; built an **MQTT**-based CAN bus telemetry pipeline at **sub-200ms latency**, collaborating with hardware, IoT, and testing teams on data accuracy.
- ❖ **REST APIs & Automated Testing:** Developed **35+** secure **REST endpoints** (Django, React, TimescaleDB) for dealer-to-customer workflows; validated via **Postman/Swagger** and automated integrity checks, eliminating manual assignment errors by **100%**.
- ❖ **Troubleshooting & Reliability:** Led root-cause analysis and debugging of real-time telemetry pipelines, resolving latency bottlenecks and ensuring **99.9%** data reliability for critical EV fleet operations.
- ❖ **Cloud Architecture & Agile Delivery:** Designed **AWS** architecture (IoT Core, S3, ECS, Lambda) for telemetry ingestion and serverless processing; collaborated in bi-weekly sprint planning and daily stand-ups under **Agile/Scrum** to align delivery with business priorities.

Projects

Desktop Ticket Booking System | *Java · Swing · JDBC · MySQL · OOP*

Dec 2025

- ❖ Architected a desktop ticket booking system in **Java & Swing GUI** using **OOP** principles and secure **JDBC** connectivity to drive scalable backend **MySQL** operations.
- ❖ Engineered a secure **role-based authentication** module separating Admin and User workflows, enabling CRUD operations for admins to manage movie catalogs, showtimes, and theatre layouts.
- ❖ Designed a dynamic seat-reservation algorithm and interactive UI rendering custom grid layouts from database dimensions, managing real-time state to prevent concurrent double-booking conflicts.
- ❖ Integrated an automated billing/checkout system generating electronic receipts from dynamic transaction data, streamlining the booking workflow with **100%** calculation accuracy.

AI-Powered E-Commerce Platform | *ASP.NET Core · React Native · MS SQL · LangChain · OpenAI · JWT*

Oct 2024

- ❖ Engineered a platform for **200+** SKUs with **18+** **RESTful APIs** (JWT auth, catalogue, cart, orders); MS SQL indexed schema cut query response time by **35%** and boosted performance by **40%**.
- ❖ Integrated an **LLM-powered Shopping Assistant** and **RAG** pipeline (LangChain · OpenAI Embeddings · Vector DB), improving relevant product visibility by **45%+** and reducing manual search effort by **60%**.

Professional Certifications

❖ **IBM Full Stack Software Developer Professional Certificate**

Apr 2025

Coursera — IBM Skills Network (15-Course Professional Certificate)

❖ **AWS Academy Cloud Virtual Internship**

Sep 2024

AICTE — EduSkills Foundation | National Internship Portal (10 Weeks)
